appointed actuary's work; and an opinion paragraph expressing the appointed actuary's opinion as required by Section 3 of the Standard Valuation Law.

**B. Recommended Language**

The following language provided is that which in typical circumstances would be included in a statement of actuarial opinion in accordance with this section. The language may be modified as needed to meet the circumstances of a particular case, but the appointed actuary should use language which clearly expresses his or her professional judgment. However, in any event, the opinion shall retain all pertinent aspects of the language provided in Section 7.

- (5) If the appointed actuary has not examined the underlying records, but has relied upon lists and summaries of policies in force prepared by the company or a third party, the scope paragraph should include a sentence such as one of the following:

"I have relied upon listings and summaries of policies and contracts and other liabilities in force prepared by (name and title of company officer certifying in force records) as certified in the attached statement. (See accompanying affidavit by a company officer.) In other respects my examination included review of the actuarial assumptions and actuarial methods and such tests of the actuarial calculations as I considered necessary."

or

"I have relied upon (name of accounting firm) for the substantial accuracy of the in force records inventory and information concerning other liabilities, as certified in the attached statement. In other respects my examination included

review of the actuarial assumptions and actuarial methods and such tests of the actuarial calculations as I considered necessary."

The statement of the person certifying shall follow the form indicated by Section 7B(10).

- (6) The opinion paragraph should include the following:

"In my opinion the amounts carried in the balance sheet on account of the actuarial items identified above:

- (a) Are computed in accordance with those presently accepted actuarial standards which specifically relate to the opinion required under this section;
- (b) Are based on actuarial assumptions which produce reserves at least as great as those called for in any contract provision as to reserve basis and method, and are in accordance with all other contract provisions;
- (c) Meet the requirements of the insurance laws and/or regulations of the state of domicile unless required otherwise by the state where the particular policy was written.
- (d) Are computed on the basis of assumptions consistent with those used in computing the corresponding items in the annual statement of the preceding year-end with any exceptions as noted below; and

The actuarial methods, considerations and analyses used in forming my opinion conform to the appropriate Compliance Guidelines as promulgated by the Actuarial Standards Board, which guidelines form the basis of this statement of opinion."

- (7) The concluding paragraph should document the eligibility for the company to provide an opinion as provided by this Section 7. It shall include the following:

"This opinion is provided in accordance with Section 7 of the NAIC Actuarial Opinion and Memorandum Regulation. As such, it does not include an opinion regarding the adequacy of reserves and related actuarial items when considered in light of the assets which support them.

Eligibility for Section 7 is confirmed as follows:

- (a) The ratio of the sum of capital and surplus to the sum of cash and invested assets is (insert amount), which equals or exceeds the applicable criterion based on the admitted assets of the company (Section 6C).

- (c) The ratio of the book value of the non-investment grade bonds to the sum of capital and surplus is (insert amount), which is less than the applicable criteria of .50.
- (d) To my knowledge, the NAIC Examiner Team has not designated the company as a first priority company in any of the two (2) calendar years preceding the calendar year for which the actuarial opinion is applicable or the company has resolved the first or second priority status to the satisfaction of the commissioner of the state of domicile.
- (e) To my knowledge there is not a specific request from any commissioner requiring an asset adequacy analysis opinion.

"... with the exception of the change described on Page ( ) of the annual statement (or in the preceding paragraph)."

The adoption for new issues or new claims or other new liabilities of an actuarial assumption which differs from a corresponding assumption used for prior new issues or new claims or other new liabilities is not a change in actuarial assumptions within the meaning of this paragraph.

- (9) If the appointed actuary is unable to form an opinion, he or she shall refuse to issue a statement of actuarial opinion. If the appointed actuary's opinion is adverse or qualified, he or she shall issue an adverse or qualified actuarial opinion explicitly stating the reason(s) for such opinion. This statement should follow the scope paragraph and precede the opinion paragraph.
- (10) If the appointed actuary does not express an opinion as to the accuracy and completeness of the lists and summaries of policies in force, there should be attached to the opinion, the statement of a company officer or accounting firm who prepared such underlying data similar to the following:

Furthermore, in situations where the annual statement instructions have provisions that conflict with the requirements of Regulation 96-104, then the provisions of Regulation 96-104 shall govern unless otherwise allowed by the Mississippi Department of Insurance.

**Section 8. Statement of Actuarial Opinion Based on an Asset Adequacy Analysis**

**A. General Description**

The statement of actuarial opinion submitted in accordance with this section shall consist of:

- (1) A paragraph identifying the appointed actuary and his or her qualifications (see Section 8B(1));
- (2) A scope paragraph identifying the subjects on which an opinion is to be expressed and describing the scope of the appointed actuary's work, including a tabulation delineating the reserves and related actuarial items which have been analyzed for asset adequacy and the method of analysis, (see Section 8B(2)) and identifying the reserves and related actuarial items covered by the opinion which have not been so analyzed;
- (3) A reliance paragraph describing those areas, if any, where the appointed actuary has deferred to other experts in developing data, procedures or assumptions, (e.g., anticipated cash flows from currently owned assets, including variation in cash flows from currently owned assets, including variation in cash flows according to economic scenarios (see Section 8B(3)), supported by a statement of each such expert in the form prescribed by Section 8E; and
- (4) An opinion paragraph expressing the appointed actuary's opinion with respect to the adequacy of the supporting assets to mature the liabilities (see Section 8B(6)).
- (5) One or more additional paragraphs will be needed in individual company cases as follows:
  - (a) If the appointed actuary considers it necessary to state a qualification of his or her opinion;
  - (b) If the appointed actuary must disclose the method of aggregation for reserves of different products or lines of business for asset adequacy analysis;

- (c) If the appointed actuary must disclose reliance upon any portion of the assets supporting the Asset Valuation Reserve (AVR), Interest Maintenance Reserve (IMR) or other mandatory or voluntary statement of reserves for asset adequacy analysis.
- (d) If the appointed actuary must disclose an inconsistency in the method of analysis or basis of asset allocation used at the prior opinion date with that used for this opinion.
- (e) If the appointed actuary must disclose whether additional reserves of the prior opinion date are released as of this opinion date, and the extent of the release.
- (f) If the appointed actuary chooses to add a paragraph briefly describing the assumptions which form the basis for the actuarial opinion.

B. Recommended Language

The following paragraphs are to be included in the statement of actuarial opinion in accordance with this section. Language is that which in typical circumstances should be included in a statement of actuarial opinion. (c) Allocated amount.

- (3) If the appointed actuary has relied on other experts to develop certain portions of the analysis, the reliance paragraph should include a statement such as the following:

"I have relied on (name), (title) for (e.g., anticipated cash flows from currently owned assets, including variations in cash flows according to economic scenarios) and, as certified in the attached statement, ..."

or

"I have relied on personnel as cited in the supporting memorandum for certain critical aspects of the analysis in reference to the accompanying statement."

Such a statement of reliance on other experts should be accompanied by a statement by each of such experts of the form prescribed by Section 8E.

- (4) If the appointed actuary has examined the underlying asset and liability records, the reliance paragraph should also include the following:

"I have relied upon listings and summaries (of policies and contracts, of asset records) prepared by (name and title of company officer certifying in-force records) as certified in the attached statement. In other respects my examination included review of the actuarial assumptions and actuarial methods and tests of the actuarial calculations as I considered necessary."

Such a section must be accompanied by a statement by each person relied upon of the form prescribed by Section 8E.

- (6) The opinion paragraph should include the following:

"In my opinion the reserves and related actuarial values concerning the statement items identified above:

- (a) Are computed in accordance with presently accepted actuarial standards consistently applied and are fairly stated, in accordance with sound actuarial principles;
- (b) Are based on actuarial assumptions which produce reserves at least as great as those called for in any contract provision as to reserve basis and method, and are in accordance with all other contract provisions;
- (c) Meet the requirements of the insurance laws and/or regulations of the state of domicile unless required otherwise by the state where the particular policy was written.
- (d) Are computed on the basis of assumptions consistent with those used in computing the corresponding items in the annual statement of the preceding year-end (with any exceptions noted below);
- (e) Include provision for all actuarial reserves and related statement items which ought to be established.

The reserves and related items, when considered in light of the assets held by the company with respect to such reserves and related actuarial items including, but not limited to, the investment earnings on such assets, and the considerations anticipated to be received and retained under such policies and contracts, make adequate provision, according to presently accepted actuarial standards of practice, for the anticipated cash flows required by the contractual obligations and related expenses of the company.

The actuarial methods, considerations and analyses used in forming my opinion conform to the appropriate Standards of Practice as promulgated by the Actuarial Standards Board, which standards form the basis of this statement of opinion.

This opinion is updated annually as required by statute. To the best of my knowledge, there have been no material changes from the applicable date of the annual statement to the date of the rendering of this opinion which should be considered in reviewing this opinion.

or

The following material change(s) which occurred between the date of the statement for which this opinion is applicable and the date of this opinion should be considered in reviewing this opinion: (Describe the change or changes.)

**Note:** Choose one of the above two paragraphs, whichever is applicable.

The impact of unanticipated events subsequent to the date of this opinion is beyond the scope of this opinion. The analysis of asset adequacy portion of this opinion should be viewed recognizing that the company's future experience may not follow all the assumptions used in the analysis.

C. Assumptions for New Issues

D. Adverse Opinions

If the appointed actuary is unable to form an opinion, then he or she shall refuse to issue a statement of actuarial opinion. If the appointed actuary's opinion is adverse or qualified, then he or she shall issue an adverse or qualified actuarial opinion explicitly stating the reason(s) for such opinion. This statement should follow the scope paragraph and precede the opinion paragraph.

E. Reliance on Data Furnished by Other Persons

The Mississippi Insurance Department or its representatives shall have the ability and authority to review the reserving processes of all insurance companies selling life, accident and health insurance in Mississippi to verify that the particular insurance company is reserving its Mississippi business pursuant to the laws and regulations of this state.

**Section 9. Description of Actuarial Memorandum Including an Asset Adequacy Analysis**

A. General

- (1) In accordance with Section 3 of the Standard Valuation Law, the appointed actuary shall prepare a memorandum to the company describing the analysis done in support of his or her opinion regarding the reserves under a Section 8 opinion. The memorandum shall be made available for examination by the Commissioner upon his or her request but shall be returned to the company after such examination and shall not be considered a record of the insurance department or subject to automatic filing with the Commissioner.
- (2) In preparing the memorandum, the appointed actuary may rely on, and include as a part of his or her own memorandum, memoranda prepared and signed by other actuaries who are qualified within the meaning of Section 5B of this regulation, with respect to the areas covered in such memoranda, and so state in their memoranda.
- (3) If the Commissioner requests a memorandum and no such memorandum exists or if the Commissioner finds that the analysis described in the memorandum fails to meet the standards of the Actuarial Standards Board of the standards and requirements of this regulation, the Commissioner may designate a qualified actuary to review the opinion and prepare such supporting memorandum as is required for review. The reasonable and necessary expense of the independent review shall be paid by the company but shall be directed and controlled by the Commissioner.

- (4) The reviewing actuary shall have the same status as an examiner for purposes of obtaining data from the company and the work papers and documentation of the reviewing actuary shall be retained by the Commissioner; provided, however, that any information provided by the company to the reviewing actuary and included in the work papers shall be considered as material provided by the company to the Commissioner and shall be kept confidential to the same extent as is prescribed by law with respect to other material provided by the company to the Commissioner pursuant to the statute governing this regulation. The reviewing actuary shall not be an employee of a consulting firm involved with the preparation of any prior memorandum or opinion for the insurer pursuant to this regulation for any one of the current year or the preceding three (3) years.

**B. Details of the Memorandum Section Documenting Asset Adequacy Analysis (Section 8)**

When an actuarial opinion under Section 8 is provided, the memorandum shall demonstrate that the analysis has been done in accordance with the standards for asset adequacy referred to in Section 5D of this regulation and any additional standards under this regulation. It shall specify:

- (1) For reserves:
  - (a) Product descriptions including market description, underwriting and other aspects of a risk profile and the specific risks the appointed actuary deems significant;
  - (b) Source of liability of force;
  - (c) Reserve method and basis;
  - (d) Investment reserves;
  - (e) Reinsurance arrangements.
- (2) For assets:
  - (a) Portfolio descriptions including a risk profile disclosing the quality, distribution and types of assets;
  - (b) Investment and disinvestment assumptions;
  - (c) Source of asset data;

- (d) Asset valuation basis.
- (3) Analysis basis:
- (a) Methodology;
  - (b) Rationale for inclusion/exclusion of different blocks of business and how pertinent risks were analyzed;
  - (c) Rationale for degree of rigor in analyzing different blocks of business;
  - (d) Criteria for determining asset adequacy;
  - (e) Effect of federal income taxes, reinsurance and other relevant factors.
- (4) Conformity to Standards of Practice

The memorandum shall include a statement:

"Actuarial methods, considerations and analyses used in the preparation of this memorandum conform to the appropriate Standards of Practice as promulgated by the Actuarial Standards Board, which standards form the basis for this memorandum."

## **Section 10. Additional Considerations for Analysis**

### **A. Aggregation**

For the asset adequacy analysis for the statement of actuarial opinion provided in accordance with Section 8 of this regulation, reserves and assets may be aggregated by either of the following methods:

- (1) Aggregate the reserves and related actuarial items, and the supporting assets, for different products or lines of business, before analyzing the adequacy of the combined assets to mature the combined liabilities. The appointed actuary must be satisfied that the assets held in support of the reserves and related actuarial items so aggregated are managed in such a manner that the cash flows from the aggregated assets are available to help mature the liabilities from the blocks of business that have been aggregated.
- (2) Aggregate the results of asset adequacy analysis of one or more products or lines of business, the reserves for which prove through analysis to be redundant, with the results of one or more products or lines of business, the reserves for which prove through analysis to be deficient. The appointed

actuary must be satisfied that the asset adequacy results for the various products or lines of business for which the results are so aggregated:

- (a) Are developed using consistent economic scenarios, or
- (b) Are subject to mutually independent risks, i.e., the likelihood of events impacting the adequacy of the assets supporting the redundant reserves is completely unrelated to the likelihood of events impacting the adequacy of the assets supporting the deficient reserves.

In the event of any aggregation, the actuary must disclose in his or her opinion that such reserves were aggregated on the basis of method (1), (2)(a) or (2)(b) above, whichever is applicable, and describe the aggregation in the supporting memorandum.

**B. Selection of Assets for Analysis**

The appointed actuary shall analyze only those assets held in support of the reserves which are the subject for specific analysis, hereafter called "specified reserves". A particular asset or portion thereof supporting a group of specified reserves cannot support any other group of specified reserves. An asset may be allocated over several groups of specified reserves. The annual statement value of the assets held in support of the reserves shall not exceed the annual statement value of the specified reserves, except as provided in Subsection C below. If the method of asset allocation is not consistent from year to year, the extent of its inconsistency should be described in the supporting memorandum.

**C. Use of Assets Supporting the Interest Maintenance Reserve and the Asset Valuation Reserve:**

An appropriate allocation of assets in the amount of the Interest Maintenance Reserve (IMR), whether positive or negative, must be used in any asset adequacy analysis. Analysis of risks regarding asset default may include an appropriate allocation of assets supporting the Asset Valuation Reserve (AVR); these AVR assets may not be applied for any other risks with respect to reserve adequacy. Analysis of these and other risks may include assets supporting other mandatory or voluntary reserves available to the extent not used for risk analysis and reserve support.

The amount of the assets used for the AVR must be disclosed in the Table of Reserves and Liabilities of the opinion and in the memorandum. The method used for selecting particular assets or allocated portions of assets must be disclosed in the memorandum.

**D. Required Interest Scenarios**

For the purpose of performing the asset adequacy analysis required by this regulation, the qualified actuary is expected to follow standards adopted by the Actuarial Standards Board; nevertheless, the appointed actuary must consider in the analysis the effect of at least the following interest rate scenarios.

- (1) Level with no deviation;
- (2) Uniformly increasing over ten (10) years at a half percent per year and then level;
- (3) Uniformly increasing at one percent per year over five (5) years and then uniformly decreasing at one percent per year to the original level at the end of ten (10) years and then level;
- (4) An immediate increase of three percent (3%) and then level;
- (5) Uniformly decreasing over ten (10) years at a half percent per year and then level;
- (6) Uniformly decreasing at one percent per year over five (5) years and then uniformly increasing at one percent per year to the original level at the end of ten (10) years and then level; and
- (7) An immediate decrease of three percent (3%) and then level.

For these and other scenarios which may be used, projected interest rates for a five (5) year Treasury Note need not be reduced beyond the point where the five (5) year Treasury Note yield would be at fifty percent (50%) of its initial level.

The beginning interest rates may be based on interest rates for new investments as of the valuation date similar to recent investments allocated to support the product being tested or be based on an outside index, such as Treasury yields, of assets of the appropriate length on a date close to the valuation date. Whatever method is used to determine the beginning yield curve and associated interest rates should be specifically defined. The beginning yield curve and associated interest rates should be consistent for all interest rate scenarios.

#### E. Documentation

The appointed actuary shall retain on file, for at least seven (7) years, sufficient documentation so that it will be possible to determine the procedures followed, the analyses performed, the bases for assumptions and the results obtained.
