

For Immediate Release

June 5, 2013

Statement of Insurance Commissioner Mike Chaney on the Democratic Healthcare proposal:

“The Mississippi Insurance Department has always looked for solutions to health insurance and healthcare care problems and we continue to do that today. Although I have not had a chance to examine in detail the plan proposed today by some members of the Legislature, it appears to be similar to what the department has worked on in the past, although I do not work on Medicaid issues. We stand committed to work with legislators, the leadership and the governor’s office to further the well-being of the people of Mississippi.”
